# Assignment -3

Registration page: This page contains Name, username, password, confirm password, email, Location Address button, and the register button. Which the address will be automatically populated in the address box.

After clicking the address search button, the address will be automatically updated to the address bar in page and when we click on the camera buttons the device camera function will be working. So, that we can take the images. Below screenshot shows the image and populated address.

Home page: In this we consist of take photo and get location buttons in this page. This home page will continue after clicking the register button in the main page of the application. In this the pre-taken image will be displayed in the home page. Screenshot is attached below.

If we click on the take photo button, then the register page image will be populated in the next page which consist of image and home. When we click on the home button the page will returned to 2nd page.

Location page: If we click on the location button the page will continue to the map location, where the map will automatically show our current location with including the image we have taken previously.
